

# expertise in emergency situations

## OUR THOUGHTS GO OUT TO THE VICTIMS OF HURRICANE SANDY

- AOM patients can be assured that we prepare in the best way possible for adverse weather conditions.
- We take many precautions to ensure continuity of care for our patients, including stocking extra medications and supplies.
- AOM is pleased we were able to service 100% of our Antibiotic and TPN patient base during Hurricane Sandy and the days following.
- AOM's nurses demonstrated their dedication by safely completing 225 visits to our patient's homes during the hurricane.

## SUPERSTORM SANDY PERFORMANCE

- "I went three days without power during the hurricane but knew that I wouldn't have to worry about going without my TPN. AOM always treats me well and takes care of me."
- "Everything has always been great. Dawn (AOM RN) just made an emergency visit to me to help with my line."
- "AOM amazes me. Mark (AOM delivery personnel) showed up at my door with my IVIG after the storm. When all other businesses were closed-AOM was not. I am so grateful to every one of you."
- "I could not believe it when I spoke to my pharmacist the morning after the storm and found out that she had walked to the office to call patients and coordinate deliveries. That's dedication!"
- "Service has been going well. They even came by right after the storm. Carl (AOM RN) treats my son really well."
